DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 1, the applicant has failed to provide any structural relationships between elements. Specifically, there are no claimed attachments between the hinges, or the stop mechanism. Note the recitations of claims 4 and 8. In addition, the base for the flat planar member should read “a support”, “the surface” should read “the top surface--”, and “the foundation” should read “the base”.

With respect to claim 2, there is no antecedent basis for “the top surface”, “is” should read “--wherein the flat planar member is--”, and “flat planar member” should read “--device--”.

With respect to claim 3, “step” should read “--device--”, and “it” should read “the step--”.

With respect to claim 4, there is no antecedent basis for “the mid section” (both recitations) or “the recessed step”, or “the side members”.

With respect to claim 6, there is no antecedent basis for “the up position” or “the down position”. In addition, it is unclear with respect to what step is rotated approximately 110 degrees. It appears that the link arms of the hinges are the elements

that are actually rotated 110 degrees. Note that step remains planar through rotation of the hinges.

With respect to claim 7, there is no antecedent basis for “the recessed step”.

With respect to claims 4-7, line 1, “hinges” should read –device--, and the phrases “wherein they” should read –wherein the hinges--, “wherein it allows” should read –wherein the hinges allow--, and “wherein there are hinges” should read –wherein the hinges are--.

With respect to claim 8, “stop mechanism”, should read –device--.

With respect to claim 8, there is no antecedent basis for ‘it’, “the inner surface” or “the side”. Note that in claim 1, four sides have been recited, so it is unclear as to which side the applicant has referred.

Were the applicant to properly address the aforementioned ambiguities, the claims would be in condition for allowance, as the prior art of record fails to teach or suggest the a device having the step, hinge assembly (means to secure the step to the base), and stop mechanism, as claimed.

Response to Arguments

Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Specifically, the applicant has now recited a base for the flat planar

Art Unit: 3634

member, a foundation, and long and short sides of the device. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

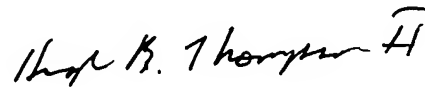

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
